CORPORATE PROFILE & SERVICE DECK

Build Better. Bid Smarter. Automate More.

From professional corporate websites and tailored business software to end-to-end tender management and custom AI automation, Neudact Engineers helps businesses turn complex requirements into disciplined, dependable solutions.

WHO WE ARE

Engineering Rigor Meets Procurement Discipline

Neudact Engineers operates at the intersection of technology, government procurement, and operations engineering. We support EPC contractors, infrastructure developers, and growing technical enterprises that require flawless compliance documentation and custom software that keeps operations running reliably.

OPERATIONAL BASE

Direct Communication & Execution

Headquartered in Gurugram, Haryana (Delhi NCR), we provide structured remote support nationwide alongside on-site technical coordination. Every engagement is managed with transparent scope, strict confidentiality, and zero sales pressure.

Four Core Business Divisions

DIVISION 01 /

Website Design & Development

Corporate, profile, and high-conversion service websites engineered with modern React 19, sub-second load times, and structured B2B inquiry capture.

React 19 · Semantic HTML5 · Tailwind CSS · Fast Cloud Delivery

DIVISION 02 /

End-to-End Tender Management

Full lifecycle support: GeM/CPPP/IREPS discovery, clause-by-clause NIT & BOQ review, PQ eligibility matrices, Cover 1 & 2 compilation, and submission coordination.

GeM · CPPP · IREPS · State Portals · Strict Compliance Matrices

DIVISION 03 /

Custom Software & Applications

Bespoke web applications, internal operational systems, role-based admin panels, inventory trackers, and database-backed workflow tools.

Node.js · PostgreSQL · Express · MongoDB · RESTful APIs

DIVISION 04 /

Custom AI Agents & Automation

Document search assistants, tender specification extractors, Excel automation pipelines, field notification bots, and human-in-the-loop AI workflows.

Vector Search (RAG) · Telegram/WhatsApp APIs · Python · Cloud Webhooks

CORE SPECIALIST PRACTICE

End-to-End Tender Management & Bid Support

We support businesses throughout the tender lifecycle, from opportunity screening and Pre-Qualification (PQ) analysis to full bid documentation, portal upload coordination, and post-submission support.

THE 6-STAGE TENDER LIFECYCLE SEQUENCE

STAGE 01
Discovery & Screening
Multi-portal surveillance across GeM, CPPP, IREPS; capability matching; opportunity executive bulletins.

STAGE 02
Detailed Analysis
NIT/BOQ/GCC/SCC review, 3-year turnover calculation, similar work criteria, EMD/PBG review, disqualification audit.

STAGE 03
Bid Documentation
Compliance matrices, Cover 1 & 2 compilation, declaration drafting, JV/MAF coordination, pre-bid queries.

STAGE 04
Quality Review
Requirement-by-requirement audit, cross-checks against authentic client records, missing document reports.

STAGE 05
Submission Support
Upload coordination on portals, DSC signature verification assistance, token archiving, receipt verification.

STAGE 06
Post-Bid Support
Corrigendum monitoring, technical query clarification replies, record management, LOA checklist verification.

Package Tier	Target Requirement	Core Scope & Deliverables
Pkg A: Tender Discovery & Screening	Businesses seeking relevant opportunities identified and assessed.	Daily/weekly portal discovery, capability matching, PQ summaries, direct document links, deadline tracking.
Pkg B: Complete Bid Preparation Support	Contractors needing structured bid preparation and submission review.	Full NIT/BOQ analysis, compliance matrices, checklists, document compilation, quality review, portal upload coordination.
Pkg C: Dedicated Tender Desk	Active contractors handling multiple concurrent public bids.	Continuous multi-bid pipeline management, recurring screening, pre-bid query drafting, and regular status reporting.

Integrity & Compliance Protocol: Actual portal submission must be performed by the client or authorized signatory where permitted. Neudact Engineers strictly works with authentic client-provided data and does not fabricate certificates, financial figures, or experience records.

DIGITAL PRESENCE

Website Design & Development

We build professional corporate and service websites engineered to establish authority, articulate technical capabilities, and capture qualified client inquiries.

Website Offerings

- Corporate & Engineering Profile Websites
- Professional Service & Capability Showcase Sites
- High-Conversion Lead Generation & Landing Pages
- Contact Form Integrations (Email, WhatsApp, CRM)
- Website Modernization, Speed Optimization & Redesigns

5-Step Execution Methodology

1. Understand business goals & target decision-makers
2. Plan information architecture & content hierarchy
3. Design clean, editorial user experience without template bloat
4. Develop in modern React 19, Tailwind CSS & perform tests
5. Deploy to fast cloud infrastructure & provide support

DIVISION 03

Custom Software & Business Applications

Tailored software designed to eliminate operational bottlenecks and replace messy spreadsheets with clean database architectures.

- Custom web applications & client portals
- Internal operations & project management tools
- Admin dashboards with persistent PostgreSQL/MongoDB
- Tender pipeline & milestone tracking systems
- Excel data processing utilities & API webhooks

DIVISION 04

Custom AI Agents & Business Automation

Practical machine intelligence that extracts information from dense documents and automates repetitive office tasks.

- Document search & company knowledge-base agents
- Tender-document clause extraction & summary agents
- Automated multi-channel alerts (Telegram & WhatsApp)
- Automated Excel report generation & two-way sync
- Strict Human-in-the-Loop review for compliance data

Target Contracting Industries

EPC & Infrastructure
Civil, highway, sub-station EPC tenders & composite PQ matrices.

Railways & Transit
IREPS portal navigation, RDSO specifications & electrical works.

Telecom & OFC
Optical fiber laying, HDD/trenching, BSNL/BharatNet tenders.

Solar & Renewables
SECI, NTPC & state DISCOM solar EPC documentation.

CCTV & Surveillance
Safe City, ICCC, campus security & technical SLA matrices.

Engineering Services
Testing, maintenance, technical staffing & ISO compliance.

Procurement Suppliers
GeM cataloging, rate contracts & EMD/PBG instrument tracking.

Growing SMEs
Corporate websites, custom applications & operational automation.

Integrated Cross-Discipline Solutions

Digital Business Launch: Corporate website + enquiry routing + lead management automation + analytics setup.

Tender Management System: Multi-portal discovery + cloud document vault + compliance checklists + milestone alerts.
